

# what is kinship care?

A kinship family occurs when a grandmother, aunt, uncle, or sibling is raising a family member. Kinship families can also include children placed with close family friends, also known as fictive kin. In either case, when a child is placed with a family member, it's new to both.

**ACH Child and Family Services is here to help you in meeting the needs of your family. For more than 100 years, our commitment is and always has been to protect children and preserve families.**
